jon.frank@aglabs.com

<http://www.highbrixgardens.com/restore/remineralization.html>

International Ag Labs offers a complete garden restoration service to help you grow high mineral density foods. This service combines the pioneering work of Dr. Carey Reams, Dr. Charles Northern, Julius Hensel, John Hamaker, and Dr. Maynard Murry who all emphasized the need to remineralize our soils in order to grow healthy foods. The service includes soil testing and a custom blend of nutrients and rock powders tailored to your soil. We also offer complete kits for growing high brix wheatgrass using a remineralizing rock powder blend.

gil@effens.com

We use microorganism based products to handle, mold, ponds, odors of all kinds, composting, agriculture enhancement etc. and we are adding re-mineralization to our line as I grew up on a farm in Iowa and watched it all disappear through chemicals. We have 9 full time staff and are based in Southern California.

We use Effective Microorganisms and are looking into purchasing a quarry for rock dust in the very near future.
